DETAILED ACTION

1. This action is responsive to the remarks of the applicant, filed on 5/3/04. Claims 1-61 are presented for further examination.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1, 3, 6, 8, 10, 12, 32, 33, 36, 38, 40 and 42 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 9 and 10 of prior U.S. Patent No. 6,263,362. This is a double patenting rejection.

Terminal Disclaimer

4. The terminal disclaimer filed on 5/3/04 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of USPN 6,263,362 has been reviewed and is accepted. The terminal disclaimer has been recorded. Claims 2, 4, 5, 7, 9, 11, 13-31, 34, 35, 37, 39, 41 and 43-61 are objected to as being dependent upon a rejected base claim, but would be allowable if

Art Unit: 2145

rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 5/3/04 have been fully considered but they are not persuasive.

(A) USPN 6,263,362, hereinafter '362, fails to claim a method or apparatus for remotely inspecting properties of communicating devices.

As to point (A), claim 1 of '362 discloses querying a remote computer to inspect any of the properties of the computer ['362, col. 101, lines 55-57]. Claim 9 discloses "a remote inspector for inspecting properties of other communicating devices" ['362, col. 103, lines 14-15. Claim 10, in same claim tree, discloses 'said remote inspector inspects remote physical measurements". Therefore, claims 1, 3, 6, 8, 10, 12, 32, 33, 36, 38, 40 and 42 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 9 and 10 of prior U.S. Patent No. 6,263,362. As shown within the claim language of '362, this is a double patenting rejection.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
